

November 14, 2020

Dear Erskine Academy Staff, Students, and Families,

Erskine Academy considers the health and well-being of our students, teachers, and staff to be of the utmost importance, which prompts the sending of this letter for your information.

An individual associated with Erskine Academy recently tested positive for Coronavirus Disease 2019 (COVID-19). **It has been determined that this case is unrelated to last week's case, and we have identified close contacts of this individual. We are confident that we can continue with our current schedule and hybrid learning model (yellow).**

There is a possibility that staff or students came in contact with this individual and therefore may be exposed to the virus. We are informing you out of an abundance of caution. Please monitor yourself/your student for signs and symptoms. Call a health care provider if symptoms start. Before going to a health care facility for testing or consultation, it is advised that you call the facility ahead of time and follow their instructions.

If you/your student is identified as a close contact of someone who tested positive, you will be contacted directly by the school, and possibly the Maine CDC, with additional guidance. **The school will notify each parent/guardian listed as an emergency contact by email within approximately 24 hours. If an email address has not been provided to the school for a parent/guardian, the student will receive the notification through their Erskine email.**

COVID-19 is a respiratory illness that ranges from mild to severe. It can be more severe in adults 60 years and older and in those with underlying conditions. The virus mainly spreads when an infected person coughs or sneezes and an uninfected person breathes in the virus. Signs and symptoms include:

- fever or chills
- cough
- shortness of breath or difficulty breathing
- fatigue
- muscle or body aches
- headache
- new loss of taste or smell
- sore throat
- congestion or runny nose
- nausea or vomiting
- diarrhea

Maine CDC recommends measures to prevent the spread of COVID-19. These measures include proper handwashing with soap and warm water, which is especially important after using the bathroom, before eating, and after blowing your nose, coughing, or sneezing. When soap and water are not available, use an alcohol-based hand sanitizer with at least 60 percent alcohol. Avoid touching your eyes, nose, and mouth with unwashed hands, and avoid close contact with people who are sick. Cover your cough or sneeze into a tissue, then throw the tissue in the trash. Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.

Questions for the school can be directed at School Nurse Tara Oxley by calling (207) 445-2962 or emailing toxley@erskine247.com. For general COVID-19 questions, dial 211 (or 1-866-811-5695). You can also text your ZIP code to 898-211 or email info@211maine.org. Call a health care provider for questions about your symptoms. More information can be found at www.maine.gov/dhhs/coronavirus or www.cdc.gov/coronavirus.

Sincerely,

Michael J. McQuarrie
Headmaster
